Subject: microsoft settlement

TO THE DEPARTMENT OF JUSTICE:

It is time for the Microsoft vs. DOJ litigation to end. In the best interest of our free enterprise system, and therefore America, the settlement in the Microsoft case must be accepted.

What if Microsoft existed in another country? How dissimilar would our economic independance be if we were in a position in software capabilities as we are in our energy situation to the "Oil Cartel?" How much of a joke would it be if we tried to "rein in" a "software cartel" from another country?

It's time to end this silliness!

Cordially yours,
Kenneth R. Parker
